Forgot the Grant/CA tasking!

I talked to Troy and sent him an email...THANKS!

Subject: DGray follow up:

Jeff/Guy,

While we move forward with routine work in times of the virus:

- Track what we are not able to complete during current situations
 - With those activities that we can't do how are we offsetting that work
 - I.e. routine enforcement inspections have ceased, instead resources are focused on addressing backlog of timely inspection reports (since not going out in the field)
 - In other words, what kind of work are we able to catch up on.

TSA Travel:

- while it is very likely we will need to reschedule, still too early to cancel our audit field work in May to Ok/La

SIP Backlog:

- He understood the situation, but was hoping Anne's implementation of taking on 'counter measures' would address the problem. I had to explain how we did not include red lighted SSM SIPs in our projections and as a result would not trigger a counter measure. I may need to further explain when Anne's 'counter measure' take over applies at the BReview.

Tx SIPs:

- SO2 error correction DGray thought it was positive
- 179b.....DGray said once Tx moves forward with Commissioner approval and going to public notice it is difficult to slow down submission. But he is aware of the challenge.

COVID 19 refinery concern not using up winter supply Clarification: is a fuel waiver request from industry a scenario to continue to use a winter blend into spring/summer time??

Did not have time to discuss FTEs and EtO.
